

Dear Dr. Klein,

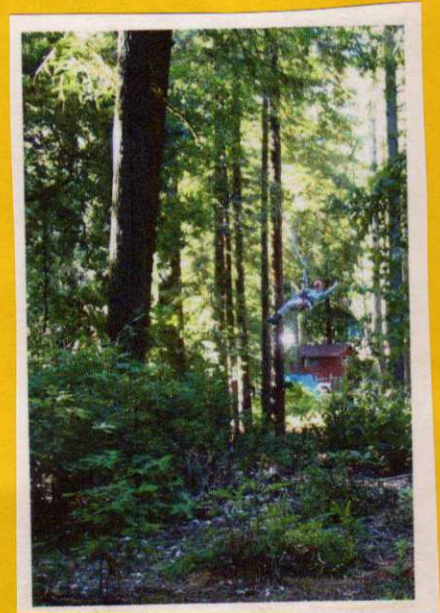

At 70+, with hip and knee replacements, is it safe for me to go on a zip line?
Actually the zip part looks pretty easy... down through the trees, across the river and back.

And you're not here to consult... so here I go.

The only problem was getting up to the platform where the zip line started.

I could've used some engineering advice.

But in the end I made it without any help.

Here I am coming in for the landing...
